The Oregonian,

FRIDAY MORNING, OCTOBER 3, 1884.

STERLING CONTRAST.

While Ohio is the only state that votes this month with the approach of vigorous political contests, most of the southern states are silent as death and the grave. In ohio one of the hottest and most hotly contested political battles that ever took place in any state is now in progress, and though the election is still nearly two weeks off, the excitement of the struggle is almost as great as if election day were to-morrow. The contrast, look at Georgia. Wednesday of this week was election day in that state, and although governor, state-house officers and members of the legislature were to be chosen there was a small vote and no opposition. A dispatch states that out of 7,000 votes in Richmond county, in which the city of Augusta is situated, not more than 800 were polled, and taking the state-at large, not over one-third of the voters appeared at the polled boxes. The reason is not far to seek. Political contests are not permitted in southern states. The shotgun holds precedence there, the party in the ascendant permits no organized opposition, and its own members, when they see that everything is fixed and no contest will be attempted, do not themselves take the trouble to vote. The political stillness of the south, the result of intolerance, tyranny, repression, murder, is the more conspicuous and impressive at this time from its contrast with the interest activity witnessed in the north, where elections are free. Yet who does not know that if there had been an attempt to confess Georgia as Ohio is being contested the result would have been countless infidelities, ending in an uproar as of all opposition in an armed despotism?

The effort to "fix the responsibility of carrying on a campaign for "thorough and reform," with the stolen election fresh upon the south as its chief instance for success, is just amazing. Here are 958 democratic votes, not half of which could possibly be secured by the democratic candidates and all of which would be active workers, were elections in the south anything but a farce that they are. In Ohio a week from next tuesday there is nothing that resembles equality between opponents. No section, in which the people could stand as equals in the right of suffrage, is permitted to exist in the south. A communication has been published in which it is virtually admitted that the railroad standard time is illegal. The writer refers by way of illustration to the time named by the senate for opening and closing the polls. What does the state mean, he asks, when it names the time for opening and closing the polls? If the absence of explanatory legislation, it may be assumed to refer to actual or meridional time. Council Bluffs, Iowa, has by ordinance adopted the central standard, which is thirty minutes fast of actual time. The law says that the polls shall be opened at 8 o'clock A. M. and shall be kept open until 6 o'clock P. M. They are opened and closed on standard time; in other words, they are opened at 7:30 A. M. and closed at 5:30 P. M., actual time. Are not the votes cast between 7:30 and 8 o'clock A. M. illegal? And have not all voters who could not, or did not, vote before 5:30 P. M., and would have voted if the polls had been kept open until 6 P. M., been deprived of the privilege which they were entitled to exercise?

This criticism has the support of high scientific authority. Dr. B. A. Gould, a leading author by among American astronomers says, in his report as director of the National Observatory to the minister of public instruction for the Argentine Confederation, upon the acquisition of a "uniform and universal time," that the system of standard time seems needed, and, to some extent, adopted in this country. It "is philosophical and reasonable," and an obstacle to the practical application of the principles is put upon it by the interests of geodetic experiment, but in Europe a year ago. He says: "The acceptance of the public clocks time established for the various cities in the same section, is a matter of some choice for travelers and great advantage to the railroads; but it is secured by sacrifices which are only outweighed by the advantages. But there is, in fact, quite little loss. Since the clocks not time are to be better obtained by factories, absolute uniformity of any assigned zone may certainly be attained, and at the same time the convenience of the public will be promoted by the adoption of the zones specified. The vote for St. John is not because he is a Methodist, but in order to defeat the Republican party in the very few states, therefore, where all signs fail, can recommend up to any present accession to their ranks as a party, although they are well as the regular republicans may be astonished at the size of the vote for Scott as a candidate for the presidency.

THE PENSION BUSINESS.

Mr. A. A. Ramsey of Boston, one of the ablest men in congress, has written a letter giving his opinion on the pension business, in which he protests his willingness to vote the same of money necessary to provide for worthy soldiers needing pensions, but he refuses to indorse either of the bills now pending or to give any assurances that he will support them either in his present or his prospective term of service. He says very independently that he does not "propose to make any promises or pledges which could be construed into a bid for support, or an effort to disarm opposition." The Loverring bill, he thinks, would increase the burden of the pension rolls to the extent of $110,000,000 a year, while the provisions of the other prominent bill, which includes graded pensions to pensioners, $8 to $30 a month to all soldiers and land warrants; would add $200,000,000 a year to the pension list, beside requiring 250,000,000 acres of land, worth $500,000,000. If other members of congress would manifest the same degree of public honesty as Mr. Ramsey, and such as Senator Thurman exhibited in refusing to be bound by the plank in the party platform this ever-pressing danger of an indefinite and useless enlargement of the pension rolls would forever disappear.

According to the *Pioneer Press* the republicans of Minnesota are making no effort to recapture congress. In the First district Congressman Wilson is in more or less trouble, but the remains of the old Downell fight in the Third. Straight had a somewhat formidable opposition within the ranks from those who have given up hope of returning him to private life except by the screening process, and in the Fourth a where Benton Baldwin is in open revolt against republican Gilfillan.

In 1876 Schurz made speeches for Hayes, at Hayes lost New York at Indiana, and barely saved Ohio. The event of 1876 proved that Schurz didn't help Hayes much, but he signs it best go to show that he will not help Blaine much.
